## Professional Summary

---

Aspiring Full Stack developer with a strong passion for building web applications from the ground up. I have been developing foundational skills in the MERN stack(MongoDB, Express.js, React, Node.js) by working on personal projects.

## Skills

---

- Frontend: HTML, CSS, JavaScript, React, Tailwind
- Backend: Node.js, Express.js, RESTful APIs
- Database: MongoDB, SQL
- Tools & Concepts: Postman, Git, GitHub

## Projects

---

### MailChat (Web Messaging App)

**Tech Stack:** Node.js, Express.js, MongoDB, React, React Router DOM, Zustand, Socket-IO, Cloudinary

- Created a real-time communication platform with near-real-time messaging, image sharing, and dynamic presence indicators for online and offline status.
- Allows avatar uploads, email-based friend discovery, and secure account deletion.
- Improved user experience and perceived performance by using loading skeletons while data is being retrieved.

### TaskMaster (Personalised To-Do App)

**Tech Stack:** Node.js, Express.js, MongoDB, React, React Router DOM, Zustand, Cloudinary

- Created a full-stack application that has strong CRUD features for managing personalized to-do tasks.
- Implemented a secure user authentication system using JSON Web Tokens (JWT) for session management and API security.
- Personalized user experience with dashboards for authenticated users to manage their tasks.
